

D fuse-bases

FUSE HOLDERS, FUSE BASES AND SUPPORTS

IEC DO & D FUSE BASES

The D fuse-system is the first generation of the screw fuse-system in the German DIN standard. It is still used in many installations.

Applications are low voltage distribution units, where non trained persons are allowed to change the fuse-links.

The D fuse-range comprises the sizes NDZ, DII, DIII, DIV, DV.

The range of applications for D fuse-links “gG” is the protection of cables and power lines. They limit and cut off unacceptable overcurrents and short circuit currents up to their nominal breaking capacity. D fuse-links “gG” also protect equipments and installations against dynamic effects of high short circuit currents.
