## UL Class CF branch circuit time-delay CUBEFuse

## Catalog symbols

- TCF_ (indicating fuse, 6-400 A)
- TCF_RN (non-indicating fuse, 1-400 A)

## Description

The Bussmann ${ }^{\text {TM }}$ series Low-Peak ${ }^{\text {TM }}$ CUBEFuse ${ }^{\text {TM }}$ is a UL® ${ }^{\circledR}$ Class CF current-limiting, dual-element, time-delay branch circuit fuse with Class J electrical performance. Available in indicating and non-indicating versions, this finger-safe fuse has a very compact, space-saving size and is easily applied using the CUBEFuse holder (TCFH_N), UL 98 Compact Circuit Protector switch (CCP2-_CF) or Compact Circuit Protector Base (CCP2B up to 100 A) used in the Quik-Spec ${ }^{\text {TM }}$ Coordination Panelboard).

## Ratings

- Volts
- 600 Vac
- 300 Vdc
- Amps
- 6-400 A (indicating)
- 1-400 A (non-indicating)
- Interrupting rating
- 300 kA RMS Sym. (Up to 100 A UL)
- 200 kA RMS Sym. ( 110 to 400 A UL)
- 200 kA RMS Sym. (Up to 100 A CSA)
- 100 kA DC (Up to 400 A UL and up to 100 A CSA)

## Electrical characteristics

- 10 seconds minimum operating time at $500 \%$ rated current
Agency information
- UL Listed Class CF fuse: Guide JDDZ, File E4273 (up to 400 A)
- CSA ${ }^{\oplus}$ Certified fuse: Class 1422-02, File 053787_C_000 (up to 100 A)
- CE (100 A and below)
- RoHS compliant

Watts loss at rated current

| Fuse amps | Watts |
| :---: | :---: |
| 30 | 3.99 |
| 60 | 6.23 |
| 100 | 9.51 |
| 200 | 18.6 |
| 225 | 17.6 |
| 400 | 35.2 |

Operating and storage temperature range

- -40 to $80^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $176^{\circ} \mathrm{F}$ )

## Features

- Smallest installed footprint of any UL Class CC, J, or R fuse solution
- Easy application using CUBEFuse holders (TCFH_N), UL 98 Compact Circuit Protector (CCP2) switches and Compact Circuit Protector Base (CCP2B up to 100 A). See data sheet 9007 for details on the CUBEFuse holder, 10801 for details on the CCP2CF switch and 1161 for the CCP2B
- Holders and switches have an amp rating rejection feature to help prevent overfusing; 30, 60 and 100 A switches and holders will hold any CUBEFuse up to its rating, 200 and 400 A switches and 200, 225 and 400 A holders will hold any CUBEFuse 110 A and above up to its rating
- UL Class CF with Class J time-delay electrical performance
- Available in indicating and non-indicating versions
- The indicating version features local easyID ${ }^{T M}$ open fuse technology for faster troubleshooting and reduced downtime
- Faster response to damaging faults helps reduce destructive thermal and magnetic forces
- True dual-element fuse construction with a minimum 10 seconds time-delay at 500\% of rating
- Long time-delay minimizes nuisance openings caused by temporary overloads and transient surges
- Up to 300 kA interrupting rating safely interrupts virtually any fault
- Robust cycling and inrush current withstand
- Low let-through currents under fault conditions
- Provides Type 2 "No Damage" protection for IEC motor starters when properly sized
- Easy selective coordination with any other Bussmann series Low-Peak Class CC, J, L or RK1 fuse with simple 2:1 amp ratio between upstream and downstream fuses
* Finger-safe status depends on final, installed application, and will require using accessory shrouds for 110 to 400 A ratings.

## Dimensions - in (mm)

| Fuse amps | A | B | C | D | E |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1-15 | 1.88 (48) | 0.75 (19) | 1.0 (25) | 0.23 (6) | 0.67 (17) |

## CUBEFuse (cat. no. TCFH_N) holders

The CUBEFuse is used in holders that can be dovetail together for the smallest footprint possible of any Class J fuse solution (see data sheet no. 9007 for details).

Finger-safe DIN-Rail or panel mount holders up to 100 A .

- 30 A holder accepts any CUBEFuse up to 30 A .
- 60 amp holder accepts any CUBEFuse up to 60 A.
- 100 amp holder accepts any CUBEFuse up to 100 A .

Panel mount holders from 200 to 400 A.

- 200 A holder accepts any CUBEFuse from 110 to 200 A
- 225 A* holder accepts any CUBEFuse from 110 to 225 A
- 400 A holder accepts any CUBEFuse from 110 to 400 A
Finger-safe installation achievable for three ganged holders and lug kits with shroud
* 200 A and 225 A holders share the same overall dimensions, but the 200 A holder will reject a 225 A fuse.

30, 60 and 100 A Compact Circuit Protector (cat. no.CCP2_CF) switches

These DIN-Rail mounted 1-, 2and 3-pole switches are UL 98 horsepower rated disconnects available with front or side rotary operators. Each CCP2 will accept a fuse amp rating equal to or less than its rating (e.g., a $60 \mathrm{~A} C C P$ will accept any CUBEFuse up to 60 A). Accessories include multi-wire lug kits with shrouds, auxiliary contacts and PLC fuse monitor (see data sheet no. 10801 for details).

200 and 400 A Compact Circuit Protector (cat. no. CCP2-CF)
switches

These panel mounted 1-, 2and 3-pole switches are UL 98 horsepower rated disconnects. Each CCP2 will accept a fuse amp rating equal to or less than its rating (e.g., a 200 A CCP will accept any CUBEFuse from 110 to 200 A). Complete installation requires installing various lugs to meet the application requirement. Accessories include side or front rotary operators and auxiliary contacts (see data sheet no. 10801 for details).

## Compact Circuit Protector Base (cat. no. CCP2B)

These 1-, 2- and 3-pole switches are UL 98 horsepower rated branch circuit disconnects. Primarily used in the Quik-Spec Coordination Panelboard, they're available in ratings up to 100 A . The CCP2B has amp rejection breaks that prevent installing any CUBEFuse amp rating greater than that of the switch. These coincide with standard conductor ampacities to help prevent overfusing and are available at $15,20,30,40,50$, $60,70,90$ and 100 amps for all 1-, 2- and 3-pole switches.
